TITLE: An Insole with Fabric

THE ASSISTANT COMMISSIONER FOR PATENTS
Washington, D.C. 20231

CLEAN VERSION OF AMENDED SPECIFICATION PARAGRAPH

Page 2, paragraph 5

B3
This object is accomplished with an insole for footwear comprising a plastic top foil and a plastic bottom foil; and one or more cavities, which are formed between the top foil and the bottom foil and filled with a liquid or a gel; wherein the top foil and the bottom foil are impermeable with respect to the liquid or gel and are joined together at least along an edge region; wherein the top foil as well as the bottom foil are equipped with a fabric extending between the foils and between the edge region, where the top foil is joined with the bottom foil; wherein the fabric extends parallel with the foil; and wherein the fabric is joined with the foil by at least partially enclosing the fabric in the foil to reinforce the mechanical strength of the foil; where the foil is initially heated up; the fabric is partly or totally pressed into the foil whereby that part of the fabric which is pressed into the foil is partly or totally enclosed in the foil; and the foil is cooled down.
